

SNP INNOVATION PVT. LTD.

Website Content Blueprint

Full Page-by-Page Content for All Sections

Innovation Infrastructure for Education · Industry · Research · Startups

WEBSITE STRUCTURE – TABLE OF CONTENTS

PAGE 1	HOME PAGE	— Complete hero, verticals, stats, testimonials, CTA
PAGE 2	ABOUT US	— Vision, Mission, Story, Team & Mentor
PAGE 3	EDTECH & STEM LABS (Primary Vertical)	— Lab setup, kits, curriculum, gallery, shop
PAGE 4	IT RESOURCING & TECHNOLOGY SERVICES	— Manpower, deployment, skill areas
PAGE 5	R&D & AUTOMATION SOLUTIONS	— End-to-end R&D, IP support, lifecycle
PAGE 6	INCUBATION CENTER	— Startup support, mentorship, idea to market
PAGE 7	WORKSHOP & ACTIVITIES	— Programs, events, CSR initiatives
PAGE 8	GALLERY	— Lab photos, events, activities
PAGE 9	CAREERS	— Internship, IT resourcing CV upload, job openings
PAGE 10	ENQUIRY / CONTACT FORMS	— Vertical-wise enquiry sections
PAGE 11	CONTACT US	— Office, map, social links

PAGE 1 — HOME PAGE

1.1 — HERO SECTION

[Full-width Banner / Animated Slider]

Headline (H1 Tag):

"Empowering the Next Generation of Innovators"

Sub-Headline:

India's Innovation Infrastructure Company — Bridging the gap between Education, Industry, Research & Startups through cutting-edge technology solutions.

CTA Buttons:

- Explore Our Solutions →
- Book a Free Demo →
- Partner With Us →

□ **NOTE:** Add a looping background video or high-quality animated banner showing lab setups, robotics demos, students working on kits, and startup ecosystems.

1.2 — IMPACT COUNTER STRIP

[Animated number counters – full-width colored bar]

METRIC	COUNT
□ Schools & Colleges Served	[ADD NUMBER]
□ STEM Lab Installations	[ADD NUMBER]
□□ IT Professionals Deployed	[ADD NUMBER]
□ R&D Projects Completed	[ADD NUMBER]
□ Startups Supported	[ADD NUMBER]
□ National & International Clients	[ADD NUMBER]

□ **NOTE:** Fill in actual numbers. Even approximate figures build strong social proof.

1.3 — WHAT WE DO (4-Vertical Grid)

[Icon Cards / Hover Animation – 2×2 Grid]

SNP Innovation operates across four high-impact verticals, each designed to create a self-sustaining innovation ecosystem:

VERTICAL	WHAT WE OFFER
□ EdTech & STEM Innovation Labs	Plug-and-play lab setups, AI/Robotics/IoT kits, and project-based learning for schools & colleges.
□ IT Resourcing & Technology Services	Skilled IT manpower supply, dedicated developer teams, and technology deployment for enterprises & startups.
□ R&D & Automation Solutions	End-to-end research, hardware/software development, automation, and IP filing support.
□ Incubation & Startup Support	Idea to market — validation, prototyping, mentorship, funding guidance, and commercialization.

1.4 — WHY SNP INNOVATION?

[3-Column Feature Strip with Icons]

We don't just supply products — we build innovation ecosystems. Here's what makes us different:

- □ End-to-End Solution Provider — from concept to commercialization
- □ Plug-and-Play Infrastructure — zero-friction lab setup for institutions
- □ Transdisciplinary Learning Approach — breaking silos between subjects
- □ Industry-Linked Training — real projects, real skills, real outcomes
- □ IP & Certification Support — patents, national & international certifications
- □ National & International Client Network — proven track record across verticals

1.5 — FEATURED VERTICAL SPOTLIGHT

[Rotating spotlight or alternating left-right content blocks]

Section alternates between the 4 verticals with image + content side by side. Each block has a headline, 2–3 sentences, and a 'Learn More' button.

□ **NOTE: Use lab photography, team photos, and prototype images for each spotlight block. Visuals are critical for this section.**

1.6 — CLIENT & PARTNER LOGOS

[Scrolling/Auto-carousel logo strip]

Trusted by leading educational institutions, enterprises, and government bodies across India and beyond.

□ **NOTE: Add logos of schools, colleges, corporates, government bodies, and international partners here. Organize into: Educational Institutions | Corporate Clients | Government Partners | International Collaborations**

1.7 — TESTIMONIALS

[Card carousel / slider]

□ **NOTE:** Add 4–6 testimonials from: School principals / HoDs after STEM lab setup, Corporate clients after IT manpower deployment, Startup founders from incubation, R&D project clients. Format: Quote + Name + Designation + Organization + Photo (optional)

1.8 — LATEST NEWS / BLOG / EVENTS STRIP

[3-column card grid]

Stay updated with our latest workshops, lab launches, startup success stories, and innovation milestones.

□ **NOTE:** Pull latest 3 blog posts or events dynamically. Add 'View All' button linking to Blog/News page.

1.9 — HOME PAGE FOOTER CTA BANNER

"Ready to Build Your Innovation Ecosystem?"

Whether you are a school looking to set up a future-ready STEM lab, a company needing skilled tech talent, a researcher seeking end-to-end R&D support, or a startup with a big idea — SNP Innovation is your partner in progress.

- □ Schedule a Free Consultation
- □ Send Us Your Requirement
- □ Visit Our Innovation Hub

PAGE 2 — ABOUT US

2.1 — PAGE BANNER

ABOUT SNP INNOVATION

More than a company — we are a movement to make India innovation-ready.

□ **NOTE: Banner image: team photo, or collage of all 4 verticals in action**

2.2 — OUR STORY

[Left image + right text layout]

SNP Innovation was founded with a singular belief: that India's greatest untapped potential lies in the space between academic knowledge and real-world application. Our founders — technologists, educators, and innovators — recognized that students were graduating without hands-on skills, industries were struggling to find job-ready talent, and brilliant startup ideas were dying without the right infrastructure and mentorship.

We set out to change that — by building Innovation Infrastructure that connects Education, Industry, Research, and Startups into one cohesive, technology-driven ecosystem.

Today, SNP Innovation operates across four powerful verticals: EdTech & STEM Lab Setup, IT Resourcing, R&D & Automation Solutions, and Startup Incubation — serving schools, colleges, enterprises, MSMEs, government bodies, and innovators across India and internationally.

2.3 — VISION & MISSION

Our Vision

To become India's most trusted Innovation Infrastructure Company — enabling every institution, enterprise, and individual to participate meaningfully in the technology-driven economy of tomorrow.

Our Mission

- Enable hands-on, project-based technology education in every institution
- Bridge the industry-academia skill gap through real-world training and deployment
- Deliver end-to-end R&D solutions — from hardware to software, concept to certification
- Support startups from idea validation to market launch
- Encourage intellectual property development and innovation culture
- Create a self-sustaining innovation ecosystem across education, industry, and entrepreneurship

2.4 — CORE VALUES

☐ Innovation First	We challenge convention. Every solution starts with 'why not?'
☐ Collaboration	We grow together — with clients, institutions, and our teams
☐ Practical Impact	Theory without application is incomplete. We build real-world skills
☐ Inclusivity	From metro schools to rural communities, we bring innovation to all
☐ Excellence	Highest quality in every lab, every deployment, every prototype
☐ Scalability	Solutions built to grow — from one school to a national network

2.5 — OUR APPROACH (Innovation Lifecycle)

[Visual horizontal process strip / timeline]

Our four-layer innovation methodology ensures that every engagement — whether a STEM lab, IT project, R&D assignment, or startup journey — follows a structured, results-oriented path:

STEP 1 — Assess	Understand institutional/client needs, current gaps, and opportunity areas
STEP 2 — Design	Architect a customized solution: curriculum, technology stack, prototype plan
STEP 3 — Deploy	Implement with precision — labs, manpower, prototypes, incubation programs
STEP 4 — Train	Build internal capacity — teachers, employees, founders — for sustainable impact
STEP 5 — Support	Ongoing AMC, technical support, mentoring, and scaling assistance
STEP 6 — Innovate	Continuously improve, upgrade, and evolve with emerging technologies

2.6 — TEAM & LEADERSHIP

[Profile cards – photo + name + role + bio]

□ **NOTE: RECOMMENDATION: Keep the Team section on the About page — it builds trust significantly, especially for institutional and enterprise clients. Use professional headshots and keep bios concise but impactful.**

Mr. Saurabh Tiwari — Chief Executive Officer (CEO)

Visionary entrepreneur and education-technology leader, Saurabh drives SNP Innovation's overall strategy, growth, and stakeholder relationships. His deep passion for democratizing quality technical education has been the driving force behind SNP Innovation's expansion across EdTech, IT services, and innovation infrastructure.

□ **NOTE: Add photo, LinkedIn profile link, and 1–2 key achievements or a brief quote from Saurabh**

Mr. Nikhil Gujar — Chief Operating Officer (COO)

The operational backbone of SNP Innovation, Nikhil oversees end-to-end execution across all four verticals — from lab installations and supply chain management to IT resourcing operations and cross-vertical coordination. His attention to detail and systems-thinking ensure that every client engagement is delivered with precision and excellence.

□ **NOTE: Add photo, LinkedIn profile link, and key operational milestones**

Mr. Pratik Warjurkar — Chief Technology Officer (CTO)

A hands-on technologist and innovator, Pratik leads SNP Innovation's technology architecture across robotics, AI, automation, and embedded systems. He spearheads all R&D initiatives, product development, and technology integration across the company's verticals — transforming ideas into working solutions.

□ **NOTE: Add photo, LinkedIn profile link, patents/projects/publications if any**

Dr. Vijay Bhatkar — Strategic Mentor

SNP Innovation is privileged to be guided by Dr. Vijay Bhatkar — one of India's most distinguished scientists and technologists. Known as the architect of India's supercomputing program (PARAM), Dr. Bhatkar provides strategic technology guidance, national-level vision, and invaluable mentorship to SNP Innovation's leadership team.

□ **NOTE: Add professional photo of Dr. Bhatkar. Include his designation and institutional affiliation. This association is a major credibility asset — highlight it prominently.**

2.7 — CSR & SOCIAL IMPACT

[Image + stats + impact stories]

At SNP Innovation, we believe that technology should be a force for equity — not just efficiency. Through our foundation-led social initiatives, we have:

- Supported rural and underserved schools with STEM innovation infrastructure
- Conducted free robotics and coding workshops for underprivileged students
- Promoted skill development and digital literacy in remote communities
- Sponsored young innovators and student entrepreneurs from Tier 2 & 3 cities

□ **NOTE: Add specific CSR numbers: schools reached, students impacted, cities covered. Add photos from these events for maximum impact.**

PAGE 3 — EDTECH & STEM INNOVATION LABS

(PRIMARY VERTICAL — Most detailed page)

3.1 — PAGE HERO BANNER

FUTURE-READY STEM INNOVATION LABS FOR SCHOOLS & COLLEGES

Where Curiosity Meets Technology — Building the Innovators of Tomorrow, Today.

□ **NOTE: Banner: High-quality photo of an active STEM lab with students using robotics/AI kits. Warm, inspiring feel.**

3.2 — THE PROBLEM WE SOLVE

[Infographic / split screen – Problem vs Solution]

India's Education System Faces a Critical Innovation Gap:

- Students study technology but never build anything with it
- Schools lack structured, hands-on STEM infrastructure
- Teachers are trained in theory, not in applied technology pedagogy
- Robotics, AI, IoT remain elite concepts — inaccessible to most institutions
- The result: graduates who know concepts but cannot apply them

SNP Innovation Changes This Equation:

We design, deploy, and sustain complete STEM Innovation Lab ecosystems — so that every student, from Class 5 to postgraduate level, gets access to real technology, real projects, and real problem-solving experiences.

3.3 — WHAT IS A SNP STEM INNOVATION LAB?

[Detailed section with icons and visual layout]

A SNP STEM Innovation Lab is a fully integrated, curriculum-aligned, plug-and-play learning environment that transforms any classroom into a cutting-edge innovation hub. Our labs are:

- Modular — scalable from a single room to a dedicated innovation wing
- Age-appropriate — designed for primary, secondary, senior secondary, and college levels
- Technology-integrated — covering Robotics, AI, IoT, Electronics, Coding, Automation, and more
- Pedagogically sound — built on Project-Based Learning (PBL) and Design Thinking principles
- Teacher-ready — includes comprehensive teacher training and support
- Curriculum-aligned — mapped to CBSE, ICSE, IGCSE, NEP 2020, and university curricula

3.4 — LAB OFFERINGS & KIT CATEGORIES

[Tab-based or Card-grid display]

□ **NOTE: Each category below should be a clickable card or expandable tab with product image + description.**

□ **Plug-and-Play Starter Kits (Foundational Level — Class 5 to 8)**

Perfect for schools just beginning their STEM journey. These kits are designed for ease of use — no complex wiring, no coding prerequisites.

- Basic Electronics & Circuit Kits
- Introduction to Robotics (block-based programming)
- Simple Automation & Sensor Kits
- Junior Coding & Logic Kits
- Fun Science & Technology Exploration Kits

□ **NOTE: Add product images and kit names for each. Include pricing tiers or 'Get Quote' CTA.**

□ **Robotics & Programming Kits (Intermediate Level — Class 8 to 12)**

Hands-on robotics experience with real programming. Students build, code, and deploy robots that solve real-world problems.

- Arduino-Based Robotics Kits
- Line-Follower, Obstacle-Avoidance, and Maze-Solver Robot Kits
- Arm & Gripper Robotics Kits
- Raspberry Pi Project Kits
- Python & C++ Programming for Robotics

□ **AI & Machine Learning Kits (Advanced Level — Class 11+, College)**

Real AI tools in students' hands. Our AI kits bridge the gap between theoretical AI concepts and actual implementation.

- Computer Vision & Image Recognition Kits
- Voice Recognition & NLP Starter Kits
- Edge AI with Jetson Nano / Coral Board
- Gesture & Facial Recognition Modules
- AI-Integrated Smart System Projects

□ **IoT & Smart Systems Kits (College & Research Level)**

Students learn to connect devices, collect data, and build intelligent systems — skills at the heart of Industry 4.0.

- Smart Home & Smart City Models
- Industrial IoT Monitoring Systems
- Environmental Sensors & Data Logger Kits
- MQTT & Cloud-Based IoT Projects
- Agriculture & Healthcare IoT Kits

□ **Industrial Automation & PLC Training Modules**

Bridging students and professionals to Industry 4.0 through real industrial-grade equipment and simulation.

- PLC (Programmable Logic Controller) Training Kits
- SCADA & HMI Simulation Systems
- Pneumatics & Hydraulics Automation Models
- Industry 4.0 Smart Factory Simulation
- Process Control & Instrumentation Kits

□ **Conceptual Problem-Solving & Design Thinking Kits**

These kits go beyond hardware — they build the mental models for innovation.

- Design Thinking Challenge Kits (Empathize → Define → Ideate → Prototype → Test)
- Sustainable Development & Green Tech Kits
- STEAM (Science, Technology, Engineering, Arts, Mathematics) Integrated Project Kits
- Critical Thinking & Innovation Challenge Boxes

3.5 — LEARNING METHODOLOGY

[Animated process steps or hexagon grid]

Our labs are not just about hardware — they embody a powerful, research-backed pedagogical framework:

Project-Based Learning (PBL)	Students work on real-world problems, not textbook exercises
Problem-Based Learning	Start with a challenge; the curriculum emerges from solving it
Design Thinking	Empathy-driven, iterative approach to innovation and prototyping
Transdisciplinary Learning	Breaking subject silos — one project spans science, math, coding, and creativity
Maker Culture	Students are creators, not just consumers of technology
Collaborative Innovation	Team-based challenges mirror real industry workflows

3.6 — COMPLETE LAB SETUP PROCESS

[Numbered horizontal timeline]

1. Needs Assessment	Site visit, curriculum audit, student profile analysis
2. Lab Design & Planning	Space design, equipment list, technology

	selection
3. Infrastructure & Installation	Furniture, wiring, internet setup, safety compliance
4. Equipment & Kit Deployment	Calibrated delivery, installation, and testing of all systems
5. Teacher Training Program	Structured training for teachers on all kits and curriculum modules
6. Curriculum Integration	Mapping lab activities to school/college academic calendar
7. Student Orientation	First lab sessions — guided projects and orientation to innovation culture
8. Annual Maintenance Contract (AMC)	Ongoing technical support, equipment upgrades, and training refreshers

3.7 — LAB LEVELS & PACKAGES

[Pricing card grid – 3 tiers]

□ **NOTE: Create 3 package tiers (Starter / Advanced / Research Grade or custom names). Each tier should show: Target Level, Key Equipment, Approximate Lab Capacity, Setup Timeline, and a 'Get Custom Quote' CTA. Avoid publishing fixed prices publicly — use 'Request Quotation' forms.**

STARTER INNOVATION LAB	Ideal for primary/middle schools entering STEM. Basic robotics, electronics, coding kits. Capacity: 20–30 students.
ADVANCED STEM LAB	For senior secondary and junior college. Robotics, AI, IoT, Arduino, Raspberry Pi. Capacity: 30–40 students.
RESEARCH & AUTOMATION LAB	For engineering colleges, polytechnics, and research institutes. PLC, industrial automation, full AI/IoT stack, R&D support.

3.8 — KEY HIGHLIGHTS & DIFFERENTIATORS

- □ Curriculum mapped to CBSE, ICSE, State Board, NEP 2020, and University curricula
- □ Dedicated teacher training — initial + refresher programs
- □ Annual Maintenance Contract (AMC) for zero-downtime labs
- □ Student competition preparation — Science Olympiads, ATL, Smart India Hackathon, FIRST Robotics
- □ IP support — patent guidance for student innovations from the lab
- □ CSR lab programs available for corporates and NGOs
- □ Custom lab design for unique institutional requirements

3.9 — TARGET INSTITUTIONS

- CBSE / ICSE / State Board Schools (Class 5 onwards)
 - IGCSE & International Schools
 - Government Schools under Atal Tinkering Lab (ATL) initiative
 - Junior Colleges & Senior Secondary Schools
 - Engineering & Polytechnic Colleges
 - Universities & Research Institutions
 - Skill Development Centers & ITIs
-

3.10 — GALLERY (Lab-Specific)

[Masonry grid / lightbox gallery]

□ **NOTE: Add 12–20 high-quality photos: lab interiors, students working with kits, teacher training sessions, competition wins, completed prototypes, lab inauguration events.**

3.11 — SHOP SECTION

[E-commerce style kit listing page]

Explore and Order STEM Kits Online — Delivered Across India

□ **NOTE: Shop section should list individual kits available for direct purchase. Useful for teachers, parents, and individual learners. Include:**

- Kit name + product photo
- Age group / level recommendation
- What's included in the kit
- Learning outcomes
- 'Add to Cart' or 'Enquire to Order' button
- Delivery: PAN India | Warranty: [X] months

Order Process (Display as numbered steps):

Step 1 — Browse	Explore our kit catalogue and select based on grade/interest
Step 2 — Enquire / Add to Cart	Fill enquiry form or add to cart for bulk institutional orders
Step 3 — Confirm & Pay	Receive quotation, confirm, and make payment (online/bank transfer)
Step 4 — Dispatch	Kits packaged and dispatched within [X] working days
Step 5 — Support	Setup guides, video tutorials, and technical support included

3.12 — STEM LAB ENQUIRY FORM

[Prominent enquiry form – below the fold or floating CTA]

Interested in setting up a STEM Innovation Lab at your institution? Fill in the form below and our team will reach out within 24 hours.

- Institution Name
- Contact Person Name & Designation
- Email Address & Phone Number
- City & State
- Institution Type (School / College / University / Government / NGO)
- Approx. Number of Students
- Area Available for Lab (sq. ft.)
- Budget Range (Approximate) — optional
- Specific Requirements or Message
- Preferred Callback Date/Time — optional

□ **NOTE: Add a 'Schedule a Free Demo' option — this increases conversion significantly.**

PAGE 4 — IT RESOURCING & TECHNOLOGY SERVICES

4.1 — PAGE BANNER

SKILLED TECH TALENT. DEPLOYED ON DEMAND. BUILT FOR REAL PROJECTS.

Bridging the gap between talent and opportunity — SNP Innovation connects skilled IT professionals with organizations that are building the future.

□ **NOTE: Banner: Professional tech workspace imagery — developers, laptops, collaborative teams**

4.2 — OVERVIEW

In a rapidly digitizing world, finding the right technical talent at the right time is one of the biggest challenges enterprises and startups face. SNP Innovation's IT Resourcing & Technology Services vertical exists to solve exactly that.

We don't just supply resumes — we deploy verified, project-ready IT professionals who integrate seamlessly with your team and deliver from Day 1. Our talent is trained on real-world projects, mentored by industry experts, and evaluated for both technical competency and professional readiness.

4.3 — SERVICES OFFERED

IT Manpower Supply & Staffing

- Short-term, long-term, and project-based IT staffing
- Dedicated developer deployment (on-site / hybrid / remote)
- Contract-to-hire and permanent placement options
- Team augmentation for fast-scaling projects

Technology Domain Coverage

Software Development	Web, Mobile (Android/iOS), Full-Stack, Backend, API Development
AI & Data Science	Machine Learning, Deep Learning, Data Analytics, Computer Vision, NLP
Embedded & Automation	Embedded C/C++, RTOS, PLC Programming, SCADA, Industrial Automation
Cloud & DevOps	AWS, Azure, GCP, CI/CD Pipelines, Docker, Kubernetes
Cybersecurity	Network Security, Pen Testing, Compliance

	& Audit Support
IoT Development	Firmware, Protocol Engineering, IoT Platform Integration
UI/UX Design	Product Design, Wireframing, Prototyping, User Research
QA & Testing	Automation Testing, Manual QA, Performance Testing

4.4 — WHY HIRE THROUGH SNP INNOVATION?

- ☐ Pre-screened candidates — technical + soft skills evaluated before deployment
- ☐ Project-ready talent — trained on real industry projects, not just theory
- ☐ Quick deployment — candidates available in [X] days from requirement
- ☐ Flexible models — part-time, full-time, project-based, dedicated teams
- ☐ Domain-specific talent — from generalist developers to niche specialists
- ☐ Continuous support — replacement guarantee and performance monitoring
- ☐ Compliance managed — PF, ESI, contracts, and statutory compliance handled

☐ **NOTE: Add a specific SLA or replacement commitment if you have one — e.g., 'Free replacement within 30 days if not satisfied.'**

4.5 — CLIENT SEGMENTS

- Technology Startups scaling their engineering team
- Mid-size IT Enterprises with project-based staffing needs
- Manufacturing & Industrial companies undergoing digital transformation
- MSMEs building their first technology team
- Government bodies and PSUs requiring IT implementation support
- International companies seeking offshore Indian tech talent

☐ **NOTE: Add [INTERNATIONAL CLIENT LOGOS] here if available — international presence adds strong credibility.**

4.6 — OUR TALENT PIPELINE

[How we source and prepare candidates]

Our talent pipeline is unique because we build it — through our own EdTech and STEM programs, internships, and industry partnerships.

Source	SNP's own STEM & EdTech programs, campus partnerships, internship alumni
Screening	Technical assessments, domain tests,

	communication evaluation
Training	Real project exposure, industry mentoring, tool-specific preparation
Deployment	Matched to client requirements, onboarding support provided
Monitoring	Performance tracking, client feedback integration, continuous upskilling

4.7 — IT RESOURCING ENQUIRY & CV UPLOAD SECTION

For Companies — Submit Your Requirement:

- Company Name & Industry
- Contact Person Name, Designation, Email, Phone
- Role / Position Required
- Technology Stack / Skills Needed
- Number of Resources
- Engagement Type (Contract / Permanent / Project-Based)
- Timeline / Start Date
- Budget Range — optional
- Any specific experience or certification requirements

For Candidates — Upload Your CV:

- Full Name, Email, Phone
- Current Location & Work Mode Preference (On-site / Remote / Hybrid)
- Years of Experience
- Primary Skills / Tech Stack
- Current Employment Status
- Expected CTC & Notice Period
- CV Upload (PDF format, max 5MB)

□ **NOTE: Add a note: 'We review all applications within 48–72 hours. Shortlisted candidates will be contacted for a technical screening call.'**

PAGE 5 — R&D & AUTOMATION SOLUTIONS

5.1 — PAGE BANNER

FROM CONCEPT TO COMMERCIALIZATION — END-TO-END INNOVATION SUPPORT

SNP Innovation holds 'Innovation' in its name for a reason. Our R&D vertical delivers complete, production-grade solutions — from basic research and hardware prototyping to software development, automation integration, certification, and IP filing.

□ **NOTE: Banner: Lab/workshop imagery with prototypes, circuit boards, automation systems**

5.2 — WHY R&D WITH SNP INNOVATION?

In a world where ideas move faster than budgets, organizations need an R&D partner that can do more than just research — they need a team that can build, test, iterate, certify, and scale. SNP Innovation is that partner.

- We own the full development lifecycle — no fragmented handoffs
 - We combine hardware and software expertise under one roof
 - We support IP filing, national & international certifications
 - We operate as a dedicated R&D arm for your organization
-

5.3 — SERVICES & CAPABILITIES

Product Design & Prototyping

- Industrial and consumer product conceptualization
- 3D design, CAD modeling, and mechanical engineering
- Rapid prototyping and iterative development
- Form-factor design and ergonomics engineering

Hardware Development

- PCB design, schematic development, and layout optimization
- Embedded systems development (microcontrollers, SoCs)
- Sensor integration and signal conditioning circuits
- Power electronics and battery management systems
- Hardware validation and EMC/EMI testing coordination

Software Development

- Firmware development (RTOS, bare-metal, Linux-based)
- Application software for industrial and consumer products
- HMI/SCADA software development

- Cloud and edge computing integration
- Mobile and web companion apps for IoT products

Automation & Industrial Solutions

- PLC programming and automation system design
- Process automation for manufacturing and production lines
- Robotics integration for industrial applications
- Smart agriculture automation systems
- Energy monitoring and optimization systems
- Quality control automation (vision-based inspection)

IoT-Based Solutions

- IoT architecture design and sensor network deployment
- Real-time monitoring and alert systems
- Data analytics and visualization dashboards
- Predictive maintenance systems
- Smart building and infrastructure management

5.4 — INNOVATION DEVELOPMENT LIFECYCLE

[Visual horizontal timeline — can be animated]

1. Idea & Research	Problem scoping, market research, feasibility study, technology survey
2. Concept Design	Architecture definition, technology selection, initial design documents
3. Prototype Development	Hardware build, firmware/software development, integration testing
4. Validation & Testing	Functional testing, stress testing, user trials, performance benchmarking
5. Automation Integration	Integration into production/industrial environment, automation overlay
6. Certification Support	Documentation for national (BIS, NABL) and international (CE, FCC, UL) certification
7. IP Filing	Patent drafting support, prior art analysis, filing assistance
8. Market Launch	Production scaling, go-to-market support, documentation, training

5.5 — KEY HIGHLIGHT: IP & CERTIFICATION SUPPORT

SNP Innovation provides end-to-end support for Intellectual Property (IP) development — from idea documentation and patent drafting to national and international filing. We also support clients in obtaining relevant quality, safety, and performance certifications for both Indian and global markets.

- Patent search and prior art analysis
- Provisional and complete patent specification drafting
- Filing support through registered patent agents
- National certifications: BIS, NABL, STQC, MeitY approvals
- International certifications: CE (Europe), FCC (USA), RoHS, ISO
- Design registration and trademark support

5.6 — SECTORS WE SERVE

- Manufacturing & Industrial Automation
- Agriculture & AgriTech (Smart Irrigation, Crop Monitoring)
- Healthcare & MedTech Devices
- Smart Infrastructure & Construction
- Defense & Aerospace (basic electronics/automation)
- Education Technology (custom lab equipment development)
- Renewable Energy (monitoring and optimization systems)
- Retail & Logistics (tracking and automation solutions)

5.7 — R&D PROJECT ENQUIRY FORM

[Dedicated requirement submission form]

Have an innovation challenge or R&D requirement? Share your brief and our technology team will respond within 48 hours.

- Name & Organization
- Email & Phone
- Sector / Industry
- Project Title / Brief Description
- Stage (Idea / Concept / Prototype / Pre-production)
- Key Technology Areas Required
- Timeline Requirement
- Budget Range — optional
- Do you require IP filing support? (Yes / No / Not Sure)
- Do you require certification support? (Yes / No / Not Sure)
- Upload Brief / Reference Document — optional

PAGE 6 — INCUBATION CENTER

6.1 — PAGE BANNER

FROM YOUR IDEA TO THE MARKET — WE BUILD IT WITH YOU

SNP Innovation Incubation Center supports early-stage technology startups with everything they need to go from ideation to commercialization — with expert mentorship, technical infrastructure, business support, and funding connections.

☐ **NOTE: Banner: Startup workspace imagery — whiteboard, team discussion, pitch presentations**

6.2 — WHY INCUBATE WITH SNP INNOVATION?

Most incubators offer office space and some mentorship. SNP Innovation goes further — we are an Innovation Infrastructure Company, which means our incubatees get direct access to:

- ☐ R&D Lab and Prototyping Facilities
 - ☐ IT Development Team Support
 - ☐ STEM & Technology Education Network
 - ☐ IP Filing and Legal Support
 - ☐ Investor & Industry Connections
 - ☐ Business Model Structuring & Go-To-Market Strategy
 - ☐ National & International Partner Ecosystem
-

6.3 — OUR INCUBATION SUPPORT PILLARS

☐ Idea Validation	Market research, feasibility analysis, competitive landscape study — we help you stress-test your idea before investing resources
☐ Prototype Development	Access to our R&D lab, hardware/software development team, and rapid prototyping tools to build your MVP
☐ Expert Mentorship	One-on-one mentoring from technology experts, industry veterans, and successful entrepreneurs
☐ Business Model Design	Revenue model structuring, unit economics, pricing strategy, and business plan development
☐ IP & Legal Support	Patent filing, trademark registration, legal entity formation, and compliance support

❑ Funding Connections	Warm introductions to angel investors, VC firms, government grants (Startup India, BIRAC, DST, etc.)
❑ Industry & Market Access	Connections to potential customers, distribution partners, and enterprise clients through SNP's network
❑ Pitch & Demo Support	Pitch deck creation, demo day preparation, investor presentation coaching

6.4 — INCUBATION JOURNEY

[Visual roadmap / timeline]

Phase 1 — Application & Selection	Submit application → Screening → Presentation to SNP panel → Selection
Phase 2 — Onboarding	Incubation agreement → Workspace/resource allocation → Mentor assignment
Phase 3 — Ideation & Validation	Market study → User interviews → Problem-solution fit analysis
Phase 4 — MVP Development	Prototype → Testing → Iteration → Working MVP
Phase 5 — Business Building	Revenue model → Sales strategy → First customers → Pilot deployments
Phase 6 — Scaling	Team building → Investor readiness → Funding round → Market expansion
Phase 7 — Graduation	Incubation completion → Alumni network → Continued advisory support

6.5 — WHO CAN APPLY?

- Student entrepreneurs and final year project teams (BTech, MTech, MBA, etc.)
- Early-stage startup founders with a technology-driven idea
- Professionals with validated ideas ready to build a venture
- Social entrepreneurs solving real-world problems with technology
- Innovators seeking to commercialize their research or patents

❑ **NOTE: Eligibility: Preference for technology/deep-tech/edtech/hardware/IoT/AI startups. Add any specific sector focus or eligibility criteria your incubation program has.**

6.6 — SUCCESS STORIES

[Card grid — startup logos + brief outcomes]

□ **NOTE:** Add 3–6 incubation success stories: Startup Name | Problem Solved | Outcome/Milestone | Funding Raised (if any). This section builds enormous credibility. Even early-stage success counts — a school that licensed a student's product, an app that got first 1000 users, etc.

6.7 — INCUBATION SUPPORT ENQUIRY FORM

Ready to turn your idea into a venture? Apply for incubation support at SNP Innovation.

- Founder Name(s)
- Email & Phone
- Current Stage (Idea / Prototype / MVP / Early Revenue)
- Startup Name (if registered)
- One-line pitch (What problem do you solve?)
- Technology Domain (AI / IoT / EdTech / HealthTech / AgriTech / Other)
- Team Size
- Are you a student / professional / researcher?
- What support do you primarily need? (Technical / Business / Funding / All)
- Upload Pitch Deck or Executive Summary — optional

PAGE 7 — WORKSHOPS, EVENTS & ACTIVITIES

7.1 — PAGE BANNER

LEARN. BUILD. INNOVATE. — SNP INNOVATION WORKSHOPS & EVENTS

Hands-on learning experiences that inspire, educate, and ignite the innovator within every participant.

7.2 — WORKSHOP CATEGORIES

□ School & College Workshops

- Robotics Fundamentals (1-day, 2-day, and 5-day programs)
- Introduction to AI & Machine Learning (hands-on, beginner-friendly)
- IoT Workshop — Build a Smart Device in a Day
- Design Thinking & Innovation Bootcamp
- Coding Bootcamp (Scratch, Python, Arduino)
- Science Exhibition Project Support Workshop

□ Industry & Corporate Workshops

- Industry 4.0 & Digital Transformation Masterclass
- PLC & Industrial Automation Hands-on Workshop
- AI for Non-Technical Managers — Decision-Making with Data
- IoT Integration for Manufacturing — Practical Workshop
- Innovation Culture Building for Teams

□ Startup & Entrepreneurship Workshops

- Lean Startup & MVP Development Workshop
- Pitch Perfect — Investor Presentation Masterclass
- IP Fundamentals — Protecting Your Innovation
- Fundraising Readiness for Early-Stage Startups

□ CSR & Community Workshops

- Free Robotics Workshop for Government School Students
 - Women in Technology Innovation Program
 - Rural Innovation & Digital Literacy Camps
 - Science Fair Mentoring for Underserved Communities
-

7.3 — UPCOMING EVENTS

[Event cards with Date, Venue, Registration CTA]

□ **NOTE:** List upcoming workshops and events here dynamically. Each card should show: Event Name | Date & Time | Venue (Online/City) | Audience | Registration Link. Add 'Notify Me' for future events.

7.4 — PAST EVENTS HIGHLIGHTS

[Photo grid / stats from past events]

□ **NOTE:** Add workshop/event photos, participant counts, testimonials from participants. Example: '200+ students trained in Robotics at [School Name], [City], [Month Year]'

7.5 — HOST A WORKSHOP AT YOUR INSTITUTION

Want SNP Innovation to conduct a customized workshop at your school, college, or company? We bring our experts, equipment, and curriculum directly to your location.

- Duration: Half-day / Full-day / Multi-day programs
- Location: Your campus or our Innovation Hub
- Customizable: We adapt content to your audience and objectives
- Certification: Participants receive SNP Innovation certificates

□ **NOTE:** Workshop Enquiry Form fields: Institution/Organization Name | Contact Person | Email & Phone | Preferred Workshop Type | Approximate Participants | Preferred Dates | Any specific requirements

PAGE 8 — GALLERY

A visual window into the SNP Innovation ecosystem — labs, workshops, events, team, and milestones.

8.1 — GALLERY CATEGORIES

[Filter tabs for easy browsing]

- All Photos
 - STEM Lab Installations
 - Students in Action
 - Workshops & Events
 - Robotics & AI Demos
 - Incubation Center
 - Team & Leadership
 - CSR Activities
 - Awards & Recognition
-

8.2 — GALLERY GRID

[Masonry/grid layout with lightbox zoom on click]

□ **NOTE:** Upload minimum 30–50 high-quality photos organized by the categories above. Ensure photos show: (1) Students actively using lab equipment — not just standing near it, (2) Teachers engaged in training, (3) Lab setups in various institutional environments, (4) Workshop moments — hands-on activity, not just lectures, (5) Prototypes and finished products, (6) Team photos — professional settings, (7) Inauguration ceremonies and client milestones

8.3 — VIDEO GALLERY

[YouTube embed grid or video lightbox]

□ **NOTE:** Embed key videos: Lab demo videos, student project showcases, testimonial videos, workshop highlights, and company overview video. A 60–90 second company overview video is highly recommended for the home page AND the gallery.

PAGE 9 — CAREERS

9.1 — PAGE BANNER

BUILD YOUR CAREER AT THE INTERSECTION OF EDUCATION, TECHNOLOGY & INNOVATION

At SNP Innovation, we don't just hire people — we grow innovators. Join a team that is reshaping how India learns, works, and builds.

9.2 — WHY WORK WITH SNP INNOVATION?

- ☐ Work on real impact projects — labs, products, startups, and R&D
 - ☐ Continuous learning environment — workshops, mentorship, and exposure to all four verticals
 - ☐ National and international project exposure
 - ☐ Be part of India's innovation infrastructure movement
 - ☐ Collaborative, non-hierarchical work culture
 - ☐ Fast career growth in a rapidly scaling organization
-

9.3 — CURRENT OPENINGS

[Job listing cards — Role | Department | Location | Type]

☐ **NOTE:** List open positions here dynamically. Suggested format: Role Title | Department (EdTech / IT / R&D / Incubation / Operations) | Location (City or Remote) | Type (Full-time / Part-time / Contract) | 'Apply Now' button. If no current openings, say 'We are always looking for talented people. Send us your CV and we'll reach out when the right opportunity arises.'

9.4 — INTERNSHIP PROGRAM

SNP Innovation Internship — Real Work. Real Learning. Real Impact.

Our internship program is not about making tea or filing documents. Interns at SNP Innovation work on live projects across EdTech, IT, R&D, and Incubation — with direct mentorship from our leadership team.

EdTech & STEM Lab Internship	Lab design, curriculum development, kit testing, school engagement
IT Development Internship	Real software/firmware projects with our tech team and client deployments
R&D & Automation Internship	Hardware/software prototyping, testing, automation projects

Business Development & Marketing Internship	Client outreach, content creation, event coordination, market research
Startup & Incubation Support Internship	Work alongside incubated startups, support founders, learn entrepreneurship

□ **NOTE: Duration: 1 month / 2 months / 6 months options. Certificate + Letter of Recommendation provided. Stipend: Mention if available or 'Performance-based stipend for 6-month internships'**

Internship Application Form:

- Full Name, Email, Phone
- College / University & Department
- Degree & Year of Study
- Preferred Internship Domain
- Preferred Duration & Start Date
- Key Skills & Tools Known
- Why do you want to intern at SNP Innovation? (100–200 words)
- Upload CV / Resume (PDF, max 5MB)
- Portfolio / GitHub / LinkedIn Link — optional

9.5 — IT RESOURCING — CANDIDATE REGISTRATION

Are you an IT professional looking for your next opportunity? Register with SNP Innovation's talent network and get matched with top companies and startups.

- Full Name, Email, Phone
- Current Location & Work Mode Preference
- Total Years of Experience
- Primary Skills / Tech Stack
- Secondary Skills
- Domain (Web Dev / AI / Embedded / Cloud / IoT / Other)
- Current Employment Status (Employed / Serving Notice / Available)
- Notice Period
- Expected CTC
- Preferred Role Type (Permanent / Contract / Freelance)
- Upload CV (PDF, max 5MB)

PAGE 10 — ENQUIRY HUB (Vertical-Wise)

One page, all enquiries — select your area of interest and submit your requirement directly to the right team.

[[Tab navigation: STEM Lab](#) | [IT Resourcing](#) | [R&D](#) | [Incubation](#) | [Workshop](#) | [General](#)]

(Refer to enquiry form fields detailed under each vertical's page above — Pages 3–7. This page consolidates all forms in one place for user convenience.)

□ **NOTE: Consider adding a 'live chat' widget or a WhatsApp Business button for quick enquiries. This significantly improves response rates.**

PAGE 11 — CONTACT US

11.1 — CONTACT DETAILS

☐ Registered Office	[Add full address — City, State, PIN]
☐ Innovation Lab / Operations Center	[Add address if different from registered office]
☐ Phone	[Add primary phone number]
☐ Email — General	[Add general contact email]
☐ Email — STEM Lab Enquiries	[Add dedicated EdTech email if separate]
☐ Email — IT Resourcing	[Add IT resourcing team email]
☐ Email — Careers / Internship	[Add HR / careers email]
☐ Office Hours	Monday – Saturday: 9:00 AM – 6:00 PM IST
☐ WhatsApp Business	[Add WhatsApp number]

☐ **NOTE: Add a Google Maps embed of your office location. Also add any branch offices or partner locations if applicable.**

11.2 — SOCIAL MEDIA LINKS

- LinkedIn: [SNP Innovation LinkedIn Page URL]
- Instagram: [SNP Innovation Instagram URL]
- Facebook: [SNP Innovation Facebook Page URL]
- YouTube: [SNP Innovation YouTube Channel URL]
- Twitter/X: [Handle if active]

11.3 — GENERAL CONTACT FORM

Quick form for any general query or feedback.

- Name, Email, Phone
- Subject
- Message
- 'Send Message' button

ADDITIONAL RECOMMENDATIONS FOR THE WEBSITE

A — GLOBAL NAVIGATION STRUCTURE

Recommended top navigation menu:

Home	Landing page
About Us	Story, Vision, Mission, Team, CSR
Solutions ▼ (dropdown)	EdTech STEM Labs IT Resourcing R&D & Automation Incubation
Shop	Kit store under EdTech section
Workshop & Events	Upcoming and past events
Gallery	Photos and videos
Careers	Jobs, Internships, CV Upload
Contact Us	Enquiry hub + contact details

B — FOOTER CONTENT

Footer should include:

- Company logo + one-line tagline
- Quick links to all main pages
- Vertical-wise enquiry quick links
- Social media icons
- Contact info (phone, email, address)
- Newsletter subscription field
- Copyright notice: © 2025 SNP Innovation Pvt. Ltd. All Rights Reserved.
- Links: Privacy Policy | Terms of Use | Sitemap

C — SEO & META CONTENT RECOMMENDATIONS

Homepage Title	SNP Innovation Pvt. Ltd. STEM Labs, IT Resourcing, R&D & Startup Incubation
Homepage Meta Description	India's Innovation Infrastructure Company — Setting up STEM Labs for schools & colleges, IT manpower deployment, end-to-end R&D solutions, and startup incubation support.
EdTech Page Title	STEM Innovation Lab Setup for Schools & Colleges SNP Innovation
IT Resourcing Title	IT Manpower & Tech Talent Deployment

	SNP Innovation
R&D Page Title	R&D & Automation Solutions — Concept to Commercialization SNP Innovation
Incubation Title	Startup Incubation Center — Idea to Market SNP Innovation

D — TECHNOLOGY & PLATFORM SUGGESTIONS

- CMS: WordPress (with Elementor) or Webflow — both allow easy content updates
- CRM Integration: HubSpot or Zoho CRM for managing enquiries and leads
- Forms: Typeform, JotForm, or native CMS forms with email notification
- Analytics: Google Analytics 4 + Google Search Console from Day 1
- Chat: WhatsApp Business API button or Tidio/Crisp live chat widget
- Email Marketing: Mailchimp or Brevo for newsletter and follow-up automation
- Map: Google Maps embed on Contact page

E — CONTENT ASSETS NEEDED (Checklist for SNP Team)

- Professional photos of all lab setups (current installations)
- Professional headshots of all 3 founders + mentor Dr. Vijay Bhatkar
- Client logos (written permission required for public display)
- Actual numbers for all impact metrics (students, labs, projects, etc.)
- 2–4 video testimonials from institutional clients (school principal / corporate HR / startup founder)
- 60–90 second company overview/brand video
- Product/kit photos with white background for the Shop section
- Case studies (1–2 pages each) for flagship projects across each vertical
